

**Fastrack Healthcare Systems
Online Adjudication**

Fastrack's Online Adjudication (NCPDP D.0) application communicates directly with thousands of PBM programs to process real time billing of medications and any products with a valid NDC, including enteral, diabetic and urological supplies. Providers receive immediate responses at the time of dispensing regarding coverage, patient responsibility, copay amounts and payment information. The module will improve cash flow by billing at the time of dispensing and is becoming a requirement for certain products and payers.

CPAP

**Better Rest Solutions
SoClean**

Using a natural sanitizing process, well known and used in both the food and water treatment industries, sanitizing the entire system is as easy as placing the mask in the SoClean and walking away. SoClean enables people to clean and maintain their CPAP machines, making it possible for them to breathe healthier air and be more compliant with their CPAP therapy.

**CPAP Holders
CPAP Holders**

CPAP Holders provide a convenient, safe and easily accessible way to use a CPAP machine, without sacrificing valuable space and causing clutter on a nightstand. The CPAP Holders rest in an unused space between a bed and nightstand. With the CPAP machine resting close to the user's head, it provides optimum hose length for freedom of movement and minimizing the potential for pulling the machine off a nightstand and damaging it.

**Sunset Healthcare Solutions
Deluxe CPAP Masks**

Deluxe CPAP Masks feature a lightweight design and soft, replaceable silicone cushions. The Deluxe Full Face mask has a streamlined footprint that creates a secure seal without the need for a forehead support. The Deluxe Nasal mask features a one-piece molded silicone rubber frame that's lightweight and easy to clean.

**Soft Goods and
Disposables**

**Allard USA
LSO Xtra**

The LSO Xtra's posterior panel is made from a patented 3D-Lite material with removable rigid anterior panels. It can be heat molded to the patient. The orthosis produces intracavitary pressure to reduce load on the intervertebral discs as well as providing spinal support.

**Orthomerica Products
California Ventura
Spinal Brace**

The PDAC-approved California Ventura Spinal Brace is simple for the patient to don and doff. The Ventura provides controlled levels of stability by featuring easily removable rigid plastic components, making it useful throughout rehabilitation. Provides for spinal control of extension and flexion. The compound closure system provides patient-regulated compression.
