### OXY-SURE BUDDY™

The Oxy-Sure 'Buddy'™ is a compliment to the nasal cannula, because it solves so many of the problems that come along with wearing the nasal cannula. Advantages include: comfortable design that relieves tube rubbing and chafing, minimal construction creates unobtrusive look, no more accidental cannula dislodgement or slippage, peace-of-mind while resting or sleeping, and relieves all the pressure points on the ears, neck, nose and cheeks.

### CHAD® THERAPEUTICS EVOLUTION™ ELECTRONIC OXYGEN CONSERVER

The newest in the line of CHAD products, the EVOLUTION™ electronic oxygen conserver is able to provide a minimum of two years operation using just two AA alkaline batteries. With a sensitive triggering mechanism, fast delivery and conserve settings up to 7 LPM, the EVOLUTION™ can accommodate a broad range of patients and conditions. The single-lumen design provides a 5:1 savings ratio at all settings. Features also include a uniform volume of oxygen with each pulse ranging from 14-40 breathes per minute and operation between 200 and 3,000 psi.

### SUNSET HEALTHCARE BACKPACK OXYGEN CYLINDER CARRIER

Sunset's backpack oxygen cylinder carrier offers a sporty look to give active seniors the freedom to enjoy the activities they love. The carrier is lightweight, fully padded and easily adjustable for added comfort. It is made from durable, non-flammable and non-abrasive materials and is machine washable. Internally, a strap holds the cylinder securely in place and is adjustable to fit any M6, C/M9 or smaller cylinders. On the outside, a large accessory pocket, double zippers and various oxygen tubing access points allow for convenience and ease of use.
