MDD Contract MS1097

Nebulizer Compressor

Item# **NEB100**
Each

Includes
- Compressor
- Disposable T-Piece Kit
- Foam Filters

Features
- Rust-resistant
- Quiet (below 60dBA)
- 6ml medication capacity
- Average nebulization rate above 0.2ml/min
- Particle size: respirable fraction 0.5 to 5um 0.5um 80%
- Compressor pressure range 30-45 PSI
- Operation pressure range 12-14 PSI
- Liter flow range 8-10 LPM

Peak Flow Meter

Item# **RES052**
10/case

50-800 L/min

- High performance
- Quality controlled
- Color areas indicator
- Slip design
- One-way valve
- Latex-free
- Phthalate-free

- The Veraseal® 2 disposable full face mask brings AIR°gel® Technology to the acute care environment for a giant step forward in patient comfort. Three color coded elbow designs make choosing the right mask for CPAP, single, or dual limb circuit NIV systems simple. The Veraseal® 2 fits quickly and easily while enhancing patient comfort. Both vented (with leak ports) and non-vented (without leak ports) versions are available for CPAP, Bilevel, and ventilator therapy.
- The AIR°gel® cushion provides the utmost in gentle cushioning to protect from pressure points and irritation. AIR°gel® promotes advanced skin protection, superior performance, and unbeatable comfort, all in a lightweight mask.
- The active headgear connector moves as the patient moves for a reliable seal.
- Breathable headgear lets patients enjoy soft, lightweight stability they can count on for a comfortable fit.

Item#
RES055
2500ml

RES056
5000ml

RES055P
Pediatric

- Chambers for ball and volumetric
- Tube
- Mouthpiece

The Volumetric Incentive Spirometer helps patients perform and monitor their own post-surgical breathing exercises. The patients are encouraged to breathe in from the device as slowly and as deeply as possible.

- Adjustable target indicator provides a volumetric guideline for adequate lung exercise.
- Dual-sided, clear and legible identification of volumes.
- Inspiratory indicator encourages patients to maintain an appropriate rate inspiration.
- Compact and ergonomic design.

Three Ball Spirometer

12/case

Item#
RES057

- Improves the patient's lung expansion by training their inhaled lung volume
- Three color coded balls inside the chamber offer incemtive for the patient

- Three color-code balls in three chambers
- Chamber to lung capacity: 600cc/sec, 900cc/sec, and 1200cc/sec
- Compact design and break-resistant plastic
- Each set includes incentive spirometer, disposable mouth piece and flexible tube

Aerosol Mask

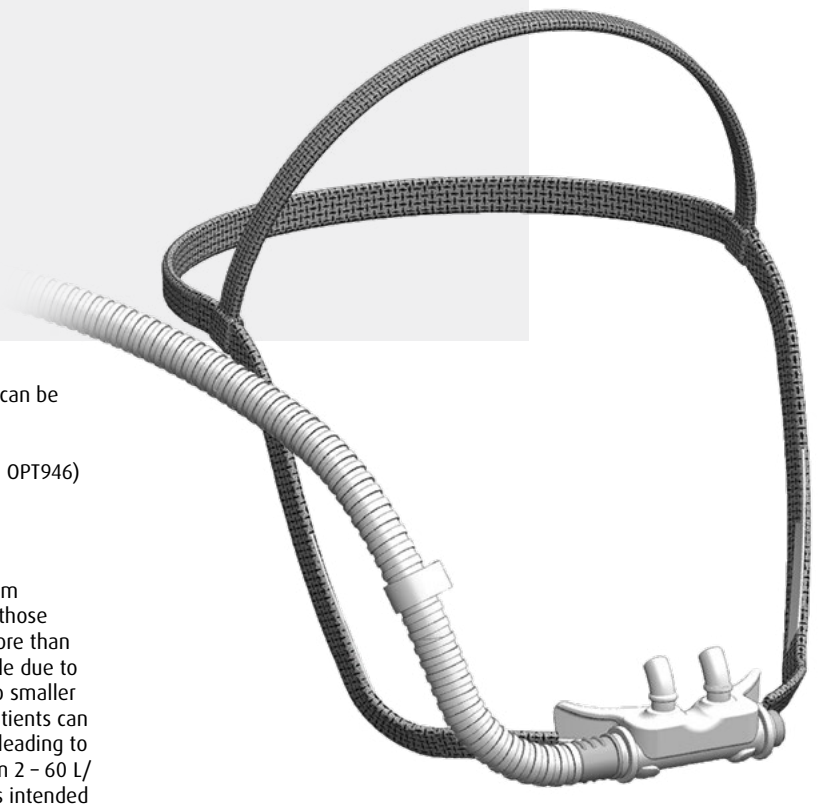
Humidoflo High Flow Nasal Cannula

10/case

REF	Size
HFN001AS	Small
HFN001AM	Medium
HFN001AL	Large



- Includes standard ISO connector and F&P adaptor so it can be used with almost any machine on the market
- Kink-free prongs and flexible, low-noise tubing
- Comparable to F&P OptiFlow cannula (OPT942, OPT944, OPT946)
- Can be used with F&P 950, 850, or Airvo system

With Nasal High Flow (NHF) therapy, patients benefit from warmed, humidified oxygen at a flow rate greater than those seen with conventional oxygen delivery devices, and more than peak inspiratory airflow. NHF treatment is better tolerable due to the heated and humidified air. The NHF apparatus is also smaller and more comfortable on the face than an NIV mask. Patients can continue eating, drinking and talking during treatment, leading to higher compliance. Delivery respiratory gases range from 2 – 60 L/min and O2 concentrations range from 21 – 100%. NHF is intended for patients in homes and long-term care facilities and may help prevent intubation.
