

Final Bacteria Replacement Filter

Product Description and Indications

Sunset Oxygen Concentrator Filters are Replacement Filters intended for use in oxygen concentrator machines to help remove contaminants, including air borne bacteria and other particulate debris from an air stream. When used with oxygen concentrator machines, the replacement filters may be used in the home, nursing home, patient care facility, etc. The Sunset oxygen concentrator filter is a replacement filter for use with Original Equipment Manufacturer's (OEMs) Oxygen Concentrator Machines.

Cautions

1. Federal law (USA) restricts this device to sale by or on the order of a physician.
2. Refer to the OEM's Instructions for Use for instructions on proper installation of filters.
3. Refer to the OEM's Instructions for Use for Recommended Filter Replacement.
4. DO NOT Wash or attempt to clean this filter. Soaking or rinsing of this filter may result in increased airflow resistance.

Warnings

1. Ensure all connections are secure.
