- Sleepnet's patented AIR°gel® technology provides maximum comfort while minimizing skin irritation and pressure points on the nasal bridge. Unlike many other gel masks, the unique qualities of AIR°gel® allow the mask to seal with minimal tension. By design AIR°gel® is twice as soft as competing gel products.
- Sleepnet has the only mask that you can shape to each individual face. Flex, Fit, Forget!
- Cushions may be removed and replaced without purchasing a new mask.
- Magnetic Clips — Easy on and off!
- 360° Swivel — Less tube drag for active sleepers.
- One size cushion — Larger fitting range.

- New wing-shaped stay routes the headgear under the ears, ensuring comfort and a great fit.
- Permanent 360° swivel provides reliable performance in any position, including over the headboard.
- Breathable cloth design eliminates fogging that is common in hard plastic masks. Nothing breathes like cloth, keeping skin dry and comfortable.
- For those who want to read or watch TV while in bed, SleepWeaver 3D can be worn with glasses.
- Users prefer a soft cloth against the face over rubber, silicone and other gels. Cloth masks eliminate the need for a cushion or nasal pad.

The Bongo Rx is a simple device with soft nasal seals and is available in various sizes (S, M, L, and XL). The Bongo Rx is an EPAP (expiratory positive airway pressure) device and works as follows:
- During inhalation, small valves open to allow normal breathing through the device.
- During exhalation, the valves close and direct exhaled air through small vents to generate EPAP, which keeps the airway open.

- No machine, tube, electricity, or batteries needed
- Use at home, traveling, camping... use anytime, anywhere
- Small enough to fit in a shirt pocket
- Reusable and easy to clean with simply soap and water
- Designed, molded, and assembled in the USA
- Clinically tested to demonstrate safety and effectiveness
- Supplemental lifestyle option for your compliant patients
- Patient friendly option for your non-compliant patients

Hybernite Heated CPAP Tube 6ft

Item#
TUB006ROC *MOQ may apply*

NEW

- Copper wire embedded in the tubing wall generates uniform heat and maintains the air temperature inside the tube to prevent rainout.
- Stand-alone kit can be used in the sleep lab or at home with any CPAP or BiPAP machine with humidifier.
- Includes heated circuit tube and independent power supply.

Compatible with machines that use standard CPAP Tubing. Not compatible with machines that use slim 15mm tubing such as newer Respironics and ResMed machines.

Snugz CPAP Mask Liners

Item#
CAP7001
Machine-Washable Liners for Most Full Face Masks
2/pack

CAP7002
Machine-Washable Liners for Most Nasal Masks
2/pack

- 2 per pack, 90-day supply
- Machine washable
- Fits MOST nasal or full face CPAP masks (Not recommended for ResMed Mirage Quattro or Respironics Amara View and Dreamwear)
- Blend of spandex, moisture-wicking polyester and lycra fibers
- Latex-free

Snugz is a machine washable, one-size-fits-most liner for CPAP masks that is designed to help reduce noisy leaks, prevent redness and irritation, and feel great against the skin. The liner helps to grip the skin and keep the mask in place around the nose and mouth, reducing the need for a chinstrap. The improved seal is especially beneficial for high-pressure/high-flow PAP patients and can reduce nightly sleep disturbances and AHI.

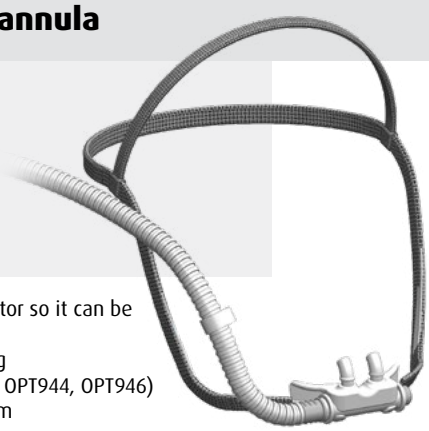
Humidoflo High Flow Nasal Cannula

10/case

Size	*Item#*
Small	**HFN001AS**
Medium	**HFN001AM**
Large	**HFN001AL**

NEW



- Includes standard ISO connector and F&P adaptor so it can be used with almost any machine on the market
- Kink-free prongs and flexible, low-noise tubing
- Comparable to F&P OptiFlow cannula (OPT942, OPT944, OPT946)
- Can be used with F&P 950, 850, or Airvo system

With Nasal High Flow (NHF) therapy, patients benefit from warmed, humidified oxygen at a flow rate greater than those seen with conventional oxygen delivery devices, and more than peak inspiratory airflow. NHF treatment is better tolerable due to the heated and humidified air. The NHF apparatus is also smaller and more comfortable on the face than an NIV mask. Patients can continue eating, drinking and talking during treatment, leading to higher compliance. Delivery respiratory gases range from 2 – 60 L/min and O2 concentrations range from 21 – 100%. NHF is intended for patients in homes and long-term care facilities and may help prevent intubation.

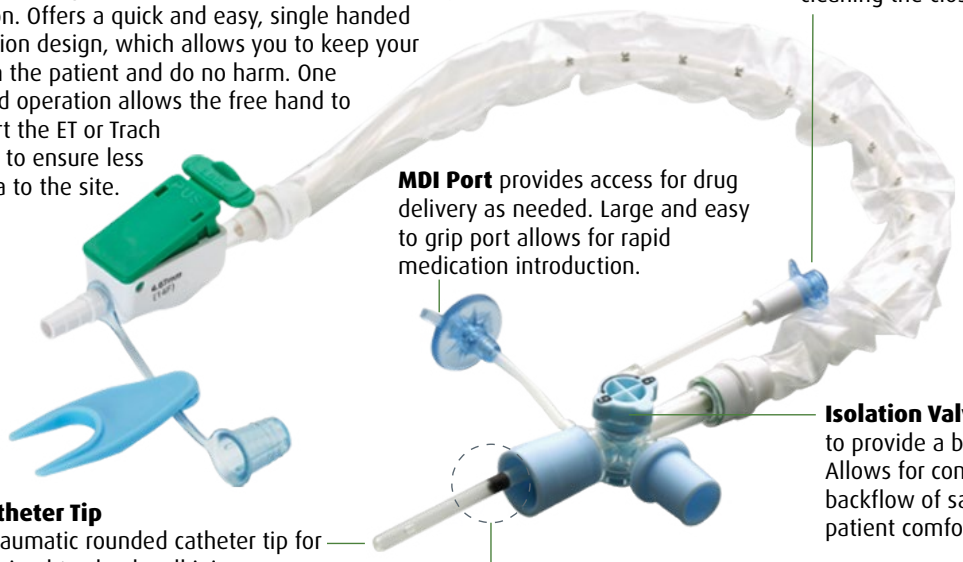
Deluxe

Suction Control Switch
Ergonomic suction control switch with a built-in security lock to visually determine if the device is in the OFF/ON position. Offers a quick and easy, single handed operation design, which allows you to keep your eye on the patient and do no harm. One handed operation allows the free hand to support the ET or Trach device to ensure less trauma to the site.

Irrigation Port offers a one-way valve to prevent backflow leakage and easy access for cleaning the closed suction system.



MDI Port provides access for drug delivery as needed. Large and easy to grip port allows for rapid medication introduction.

Isolation Valve seals the irrigation chamber to provide a better cleaning of the catheter. Allows for continuous ventilation and prevents backflow of saline during cleaning to ensure patient comfort and safety.

Catheter Tip
Atraumatic rounded catheter tip for minimal tracheal wall injury.

Black Ring Indicator ensures that the catheter is properly withdrawn from the ET or Trach device. Black ring must be visible in the plastic sheath after suctioning the patient.

Bath Safety

PreserveTech™ 360° Swivel Bath Chair

Item#
BSE001

Compact and customizable, the PreserveTech™ Swivel Bath Chair provides a safe transfer in and out of the tub for those with limited mobility. The seat rotates a full 360° in either direction and automatically locks at 90° intervals to help prevent skin irritation and friction wounds during transfers. The seat height can be adjusted from 15"–22", and the padded armrests can be raised out of the way.

Splash Defense™ Transfer Bench

Item#
BSE002

Splash Defense™ Transfer Bench is the first of its kind to allow the shower curtain liner to remain inside the bath tub while a user is bathing. This unique product enhancement is essential to help prevent water from spilling out onto the bathroom floor, creating a danger zone for users and caretakers. The Splash Defense™ Transfer Bench provides security for the caretaker, while giving users back their independence and allowing them to bathe safely and privately again.

PreserveTech™ 360° Swivel Bath Chair

Item#
BSE003

Introducing the PreserveTech™ Universal Raised Toilet Seat. With our first ever, truly universal raised toilet seat users can set three different seat heights (2, 4 or 6") by maneuvering just two components. This seat can fit on most standard and elongated toilets and features two hygienic cutaways for easy cleaning. The pivoting armrests can be raised or removed, depending on user needs and bathroom space. This item also includes a lid with a recessed grip for effortless opening.

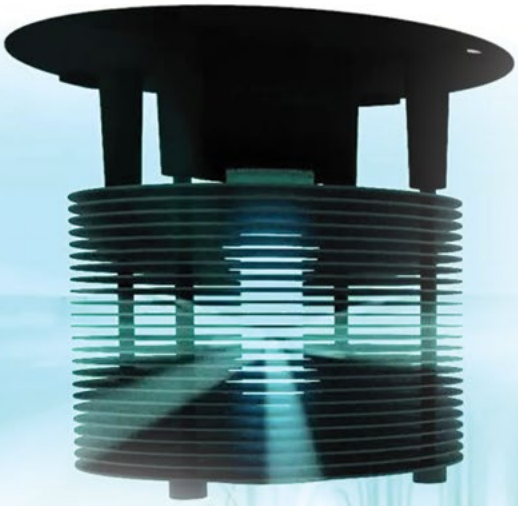
BOLT Clean Air System

NEW

Item#
BOL1001
Each



BOLT is the 360° commercial unit that can be used safely while people are in the room, allowing for a continuous and comprehensive germicidal UVC disinfection that kills 99.9% of viruses. BOLT uses ultraviolet light to create an eradication zone, destroying viruses, bacteria, and other pathogens at a DNA level, and disabling their ability to multiply and cause disease.

BOLT safely eradicates viruses with shielded UVC light. Its state-of-the-art engineered louver system protects people from direct UVC light rays. This means BOLT provides real time air sanitation and protection for customers, clients, employees, and students while they work, shop, learn, and dine indoors. BOLT's patent pending design comes from the team's decades of niche experience with plastics.

BOLT's technology is a recommended method to reduce exposures to SARS-CoV-2, the virus that causes COVID-19.

Included:
- 1 BOLT Louver System
- 1 UV-C Germicidal Light Bulb
- All necessary mounting hardware
- Operating instructions

GuideBlade™

Precise, on the wire incisions for guidewire assisted catheter insertion

GuideBlade—Precision Incisions, Every Time!

Evaluation of the efficacy and safety of a novel dermatotomy device for central venous cannulation

Worasak Keeyapaj, MD., Albert T. Cheung, MD.

Department of Anesthesiology, Perioperative and Pain Medicine, Stanford University, Stanford, California

Outcome	Number (%)
Primary outcome: Successful lines insertion without additional instrument	188 (100%)
Wire damage	0 (0%)
Operator injury	0 (0%)

About the GuideBlade™

The GuideBlade™ is the only disposable scalpel on the market engineered specifically to streamline over the wire vascular access placement. The GuideBlade™ allows clinicians to perfectly align the dermatotomy incision made during vascular access placement with the in situ guidewire. This alignment prevents residual skin tags and eliminates the need for dermatotomy revisions.

GuideBlade™ Clinical Benefits

- Less insertion site bleeding.
- Maintenance of insertion site skin integrity.
- Decreased risk of catheter bacterial colonization.
- Decreased risk of wire related complications (wire fracture and wire kinking).
- Decreased scarring/improved cosmetic result.

GuideBlade™ In Practice

- Appropriate for use with guidewires up to and including 0.035" diameter.
- Useful for placement in a wide range of venous access devices including central venous catheters, PICC lines, venous introducer sheaths, hemodialysis catheters, and percutaneous ECMO cannulas.
- Particularly useful in procedures placed while wearing protective faceshields where condensation and glare can obscure visualization of the guidewire insertion site.
- Particularly useful in obese or bleeding patients where wire entry site can be obscured by excess soft tissue or entry site bleeding.
- Increased benefit when used by trainees and less experienced practitioners.

The GuideBlade™ Value Proposition

- Decreases the need to replace kit components (like guidewires, dilators or catheters) that are easily damaged by residual skin tags often seen with standard disposable scalpel use.
- Decreases insertion site bleeding, thereby decreases the need for frequent dressing changes.
- Maintains skin integrity and thereby decreases risk of catheter colonization and associated infection.

Misaligned skin incisions make passage of dilators and catheters difficult and can lead to guidewire kinking and fracture. Revision of incisions may increase the risk of insertion site bleeding, scarring and catheter associated bloodstream infection.

pediatric device for induction of anesthesia

Stop “brutane” mask induction and turn panic into play

For children, the process of undergoing surgery is already unsettling, and the process of mask-based induction is often the most traumatizing part. Often kids will kick and scream rather, believing they’re being trapped by the gas or suffocated by the mask. The experiences create negative emotional scarring that can last weeks, months or even years.

With the introduction of the revolutionary Pediatric Device for Induction of Anesthesia device, or “PeDIA” for short, that stress and anxiety can be replaced with something colorful and fun.

As the world’s first mask-free system and method for inhalation induction, the PeDIA provides a solution to this problem that anesthesia providers have been researching for decades. It replaces the mask with a colorful balloon, which actually allows the child to put themselves to sleep rather than being forced to submit to an unfamiliar mask.

PeDIA resolves the problems of traditional mask induction while fostering a sense of trust and patient satisfaction.

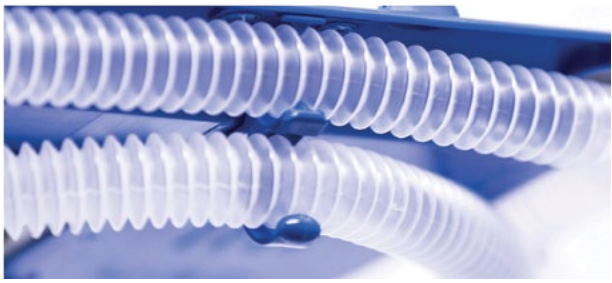
Anestand®

Customized anesthesia workstation for every anesthetizing location

Item#
ANE77006
Anestand Anesthesia Stand, Complete Tray and Clamp

ANE77001 Replacement Tray
ANE77005 Replacement Clamp

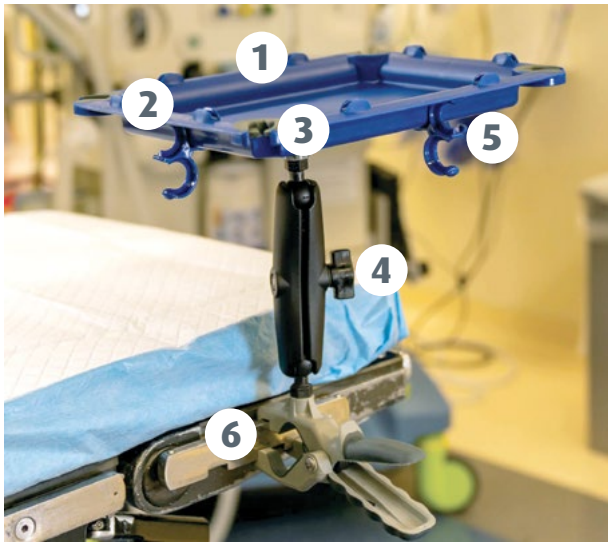


Benefits to Providers

- Keep medications near IV port
- Ergonomical work space
- Makes wiping IV port easy
- Extra set of hands when help not around
- Helps make RSI safe
- Creates valuable space for non-OR anesthesia

Value to Hospital

- Helps with regulatory compliance
- Sharps management
- Could help reduce HAIs
- Demonstrates support for anesthesia team
- Reusable/single fixed cost



1. The recessed tray holds and organizes supplies for induction of anesthesia and most anesthetic procedures
2. Clips keep IV tubing securely in place, so it's easy to "scrub the hub"
3. Corner grips for suction tubing and more
4. The adjustable support post lets you position it just where you need it
5. The anesthesia circuit clips keep your circuit fixed and firmly in place
6. Patented clamp attaches to OR bed, IV pole, or inpatient bed

The first and only anesthesia stand to safely and securely keep all supplies where they're needed can also be one of your best weapons in combatting infections.

Anestand Facts

- A small investment could help in compliance, save time and quickly pay for itself.
- By having supplies and medications organized and easily available with IV port ready, Anestand aids in patient safety.
- The bottom line: Anestand could help prevent costly infections and save money by helping anesthesia providers save OR time.

Of all the many safety and security features Anestand offers, perhaps the single greatest is how it helps health systems to lower HAIs.

- Having IV port ready for site alcohol scrub makes disinfection (and compliance) easier — Anestand keeps your IV port ready for scrubbing.
- By keeping medications immediately available and infusion ports clearly defined Anestand provides additional safety.
- By keeping supplies immediately available, Anestand helps make RSI (rapid sequence inductions) safe.
- During COVID, Anestand assists anesthesia providers as an extra pair of hands, while other healthcare personnel are being asked to keep distance from the airway.

Anestand can provide value in safety, compliance, and convenience. As soon as you use it, you'll wonder how you ever managed without it.

- CDC, JCAHO, SHEA, and other organizations require cleaning the port with every injection. Anestand helps your facility and providers comply with these regulations.
- Patients with an HAI stay 19 additional days, or $11.2 million in HAI treatment and/or lost revenue. For a small fixed cost your facility could get a large return on investment.
- Keeping supplies organized on a tray may prevent dropped items and reduce replacement costs. Anestand makes it far easier to keep supplies organized and right at hand.
