- Sleepnet has the only mask that you can shape to each individual face. Flex, Fit, Forget!
- Cushions may be removed and replaced without purchasing a new mask.

- Magnetic Clips — Easy on and off!
- 360° Swivel — Less tube drag for active sleepers.
- One size cushion — Larger fitting range.

Veraseal 2 Disposable Gel Mask with Headgear V

• The Veraseal® 2 disposable full face mask brings AIR°gel® Technology to the acute care environment for a giant step forward in patient comfort. Three color coded elbow designs make choosing the right mask for CPAP, single, or dual limb circuit NIV systems simple. The Veraseal® 2 fits quickly and easily while enhancing patient comfort. Both vented (with leak ports) and non-vented (without leak ports) versions are available for CPAP, Bilevel, and ventilator therapy.

• The AIR°gel® cushion provides the utmost in gentle cushioning to protect from pressure points and irritation. AIR°gel® promotes advanced skin protection, superior performance, and unbeatable comfort, all in a lightweight mask.

• The active headgear connector moves as the patient moves for a reliable seal.

• Breathable headgear lets patients enjoy soft, lightweight stability they can count on for a comfortable fit.

Assured, repeatable accuracy to enable safe, effective weaning.

What is Microflow used for?

Microflow is primarily used to supply supplementary oxygen to infants with bronchopulmonary dysplasia (BPD).

BPD is common in very low birth weight and pre-term infants that have needed mechanical ventilation or have been treated with high oxygen concentrations due to respiratory distress syndrome (RDS)/chronic lung disease (CLD).

The risk of RDS/CLD is inversely related to birth weight and gestational age.

Infants may need very low supplementary oxygen for many months to compensate for underdeveloped lungs.

Microflow benefits

· Enables baby to receive oxygen therapy at home, putting families together sooner and increasing parent satisfaction
· Less time in hospital, lower cost of care
· Accurate, repeatable steps
· Micro step changes in flow
· Enables low flow rates to achieve target saturation
· Enables oxygen flow to be weaned

Lynx Venturi Oxygen Delivery V P

Low Concentration

Item# **RES2400**
Each
Adapter Only **RES240LC**

- Design replaces multiple venturi adapters
- Connects to oxygen tubing and regulates flow
- Provides precision FiO_2 delivery from 24–60% with less than 2% variance during mild, moderate, and severe respiratory distress
- Excellent CO_2 washout

Six O2 ports deliver concentrations of:

24%
28%
35%
40%
50%
60%

35%
40%
50%
6 lpm
8 lpm
12
Unprecedented simplicity

No training required. Intuitive design makes it easy for nurses to operate without assistance, freeing up RTs to work where most needed.

Do no harm

Quicker de-escalation of O_2 levels and prevention of excessive CO_2 in the patient.

Reduction in waste

Remains with patient throughout EMS and hospital journey, replacing multiple adapters which may get lost or contaminated during transition.

Unmatched precision

Provides specific levels of oxygen with less than 2% variance. Comparable products vary by as much as 30%.

High Concentration

Item# **RES2401**
Each
Adapter Only **RES241HC**

- Allows rapid de-escalation of FiO_2 in the EMS ambulance or ED to prevent CO_2 buildup.
- Replaces bulkier high concentration venturis and non-rebreather bag systems
- Accurate assessment of the severity of hypoxemia (PaO_2/FiO_2) allows early intervention and better outcomes
- Excellent CO2 washout

Single flow (flush) with an adjustable window shutter delivers oxygen concentrations of 65% · 80% · 100%

Capabilities could include replacing non-rebreathers and/or partial rebreather products

Humidoflo High Flow Nasal Cannula V P

10/case

- Tube Side Quick Switch connects tube to either side of the patient
- Kink-free prongs and flexible, low-noise tube
- Compatible with any ventilator with a standard 22mm ISO connector, including Respironics V60
- Suitable alternative to Philips AC611
- Can be used with F&P 850 and 950 with HFN001-FPA adapter
- Comparable to F&P OptiFlow cannula (OPT942, OPT944, OPT946)

19mm with 22mm cuffs

HCPCS# A7037

- Compatible with nearly all CPAP, BiPAP and BiLevel systems for every manufacturer on the market
- Smooth interior and a corrugated exterior for excellent flexibility and unrestricted interior flow characteristics
- Injection molded cuffs to reduce tearing
- Low memory to avoid kinks
- BPA-free and latex-free

Firesafe Thermal Shut-Off Valve Ⓥ

Item#
RES010-10
Bidirectional
10/case

- A thermal fuse designed to stop the flow of gas in the event that the downstream oxygen tubing is ignited
- Helps protect against oxygen tubing fires
- Helps keep patients safe no matter what method of oxygen delivery they use
- Offers a cost-effective solution to lower the risk of serious patient injury in an oxygen fire

- Smaller
- Laser etched
- Expiration date
- Human readable UDI
- Designed to last 5 years

Firesafe™ Cannula Valve with adapter or Firesafe™ Nozzle

Firesafe™ Cannula Valve

O₂

Firesafe™ Cannula Valve with adapter or Firesafe™ Nozzle

Home oxygen fires represent a much higher risk in the United States than the United Kingdom, where the fitting of thermal fuses for oxygen is mandatory.

RES050
Up to 15 LPM · 6 psi · 500 ml
50/case
HCPCS# E0560
OEM# HUM001

- Multi-threaded lid ensures a secure fit, preventing leaks and service calls
- Audible back pressure alarm activates at 6 psi
- No aluminum fitting in stem eliminates aluminum shreds often found in lower quality models
- Soft plastic diffuser reduces clogging due to mineral build-up
- Translucent jar provides improved visibility of jar contents

- Humidifier bottle lid is colored green/yellow, making it easy to tell patients on the phone how to change the bottle
- Bottle fill line is very easy to see
- Finger grips at the top of the bottle make the lid easier to screw on/off for the patient

Pediatric

SCAN FOR VIDEO

- Chambers for ball and volumetric
- Tube
- Mouthpiece

The Volumetric Incentive Spirometer helps patients perform and monitor their own post-surgical breathing exercises. The patients are encouraged to breathe in from the device as slowly and as deeply as possible.

- Adjustable target indicator provides a volumetric guideline for adequate lung exercise
- Dual-sided, clear and legible identification of volumes
- Inspiratory indicator encourages patients to maintain an appropriate rate inspiration
- Compact and ergonomic design

Three Ball Spirometer

Item#
RES057-10 P
10/pack

RES057 V P
12/case

- Improves the patient's lung expansion by training their inhaled lung volume
- Three color coded balls inside the chamber offer incentive for the patient

- Three color-code balls in three chambers
- Chamber to lung capacity: 600cc/sec, 900cc/sec, and 1200cc/sec
- Compact design and break-resistant plastic
- Each set includes incentive spirometer, disposable mouth piece and flexible tube

Drainage Bag with T-Adapter V P

90-Degree CPAP Tubing Elbow **V** **P**

Item# **CAP1027**
Each

The Sunset 90-Degree CPAP Tubing Elbow Adapter connects standard 22mm or slim 15mm CPAP tubes to most CPAP machines at a 90-degree angle, relieving stress on the tubing connection and creating a more convenient pathway to the bed.

Comparable to OEM# 37394

Solidifier — Dissolvable Sachet

100/case

Item#	Size
RES8001	150cc
RES8004	450cc
RES8015	1500cc

Economical
Pre-measured rupturing pouches eliminate the tearing and spillage associated with conventional solidifiers for medical waste.

Particulate-Free
Self-activating technology reduces particulates and bacterial exposure, and eliminates harmful dust.

Reduce Exposure
Helps to minimize the risk of cross contamination of infectious waste to medical staff.

Solidifier with Treatment — Dissolvable Sachet

100/case

Item#	Size
RES8002T	250cc
RES8005T	500cc
RES8007T	750cc

Contain spills quickly with this astonishingly absorbent liquid solidifier packet
Super absorbent packets quickly absorb up to 400 times their own weight in aqueous solutions. These drop-in liquid absorbers offer the ideal solution for shipping, storing, and handling of aqueous solutions that must be contained quickly and effectively in the event of a leak.

Smart Design
Specially formulated pouch bursts open in the presence of a wide range of fluids to quickly immobilize them. Solidified material is easily contained by an outer vessel, shipping container, or other such device, resulting in safer handling.

Ideal for Medical Use
The most common applications for the use include medical shipping containers and bio-specimen transportation bags used for vials, test kits, and lab trays.

Closed Ventilation Suction System Ⓥ

Standard Switch
Sterile and latex-free

ISO color coded for instant recognition of catheter sizes.

Once the airway is clear, withdraw the catheter completely into the plastic sheath. A black mark on the catheter indicates full withdrawal.

Smooth tubing surface and atraumatic rounded catheter tip for minimal tracheal wall injury.
With the unique isolation valve, 72hr closed suction system features safe and simple access for mechanical ventilated patients for 72 hours of continuous use.

Closed Ventilation Suction System Ⓥ

Deluxe Switch (One-handed operation)
Sterile and latex-free

Irrigation Port
Offers a one-way valve to prevent backflow leakage and easy access for cleaning the closed suction system.

Suction Control Switch
Ergonomic suction control switch with a built-in security lock to visually determine if the device is in the OFF/ON position. Offers a quick and easy, single-handed operation design, which allows you to keep your eye on the patient and do no harm. One-handed operation allows the free hand to support the ET or Trach device to ensure less trauma to the site.

MDI Port
Provides access for drug delivery as needed. Large and easy to grip port allows for rapid medication introduction.

Catheter Tip
Atraumatic rounded catheter tip for minimal tracheal wall injury.

Isolation Valve*
Seals the irrigation chamber to provide a better cleaning of the catheter. Allows for continuous ventilation and prevents backflow of saline during cleaning to ensure patient comfort and safety.

*Only available with 72 Hour catheter

Black Ring Indicator
Ensures that the catheter is properly withdrawn from the ET or Trach device. Black ring must be visible in the plastic sheath after suctioning the patient.

- Single patient use
- Set includes PVC reservoir bag, PVC mask, and disposable oxygen tubing
- 100% Medical grade PVC material
- Latex-free components
- All-in-one intake valve connects to oxygen reservoir bag directly
- Diverter is able to attach PEEP valve

Disposable Pressure Manometer P

Item# **RES8201**
25/case

- Pressure range 0-60 cm H2O
- Indicator strip
- All models have the pressure range emboss printed on the housing
- Some users like to also have a color strip / indicator

Disposable Pressure Manometer, L-Shaped P

Item# **RES8201L**
25/case

- Pressure range 0-60 cm H2O
- Indicator strip
- All models have the pressure range emboss printed on the housing
- Some users like to also have a color strip / indicator

Reusable PEEP Valve, Orange P

2-10cm H2O

PeDIA - Pediatric Device for Induction of Anesthesia

Item#
**ANEP021Y**
With Mask Adapter Elbow
12/pack

2025 Innovation Celebration Winner

Use with mask

Or use without mask

Turn panic into play

For children, undergoing surgery is already unsettling, and the process of induction is often the most traumatizing part. Often kids will kick and scream, believing they're being trapped by the gas or suffocated by the mask. The experiences create negative emotional scarring that can last weeks, months or even years.

Specially designed for children undergoing surgery, the Pediatric Device for Induction of Anesthesia device, or "PeDIA," for short, includes a colorful whistling balloon, providing kids with something fun to focus on and turning a stressful moment into a lighter one.

Whether they're squeezing the balloon and focusing on its whistle or directly putting themselves to sleep by breathing the gas through balloon delivery, the PeDIA balloon captivates children's attention, allowing their active participation in the induction process.

It's a simple way to add a brighter touch to the medical experience, ease anxiety and bring smiles to patients, parents and staff.

This unique approach—presenting an interactive, familiar toy-like device—not only diverts children's focus from the impending procedure but also significantly reduces the anxiety and resistance commonly associated with mask induction. The aim is to decrease the anxiety felt by over 50% of pediatrics as well as parents and staff.

The PeDIA can be used alone as a mask-free device or, for younger children, with an anesthesia mask.
