Range E	0	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09	0.1	1

Assured, repeatable accuracy to enable safe, effective weaning.

What is Microflow used for?

Microflow is primarily used to supply supplementary oxygen to infants with bronchopulmonary dysplasia (BPD).

BPD is common in very low birth weight and pre-term infants that have needed mechanical ventilation or have been treated with high oxygen concentrations due to respiratory distress syndrome (RDS)/chronic lung disease (CLD).

The risk of RDS/CLD is inversely related to birth weight and gestational age.

Infants may need very low supplementary oxygen for many months to compensate for underdeveloped lungs.

Microflow benefits

- Enables baby to receive oxygen therapy at home, putting families together sooner and increasing parent satisfaction
- Less time in hospital, lower cost of care
- Accurate, repeatable steps
- Micro step changes in flow
- Enables low flow rates to achieve target saturation
- Enables oxygen flow to be weaned

Lynx Venturi Oxygen Delivery

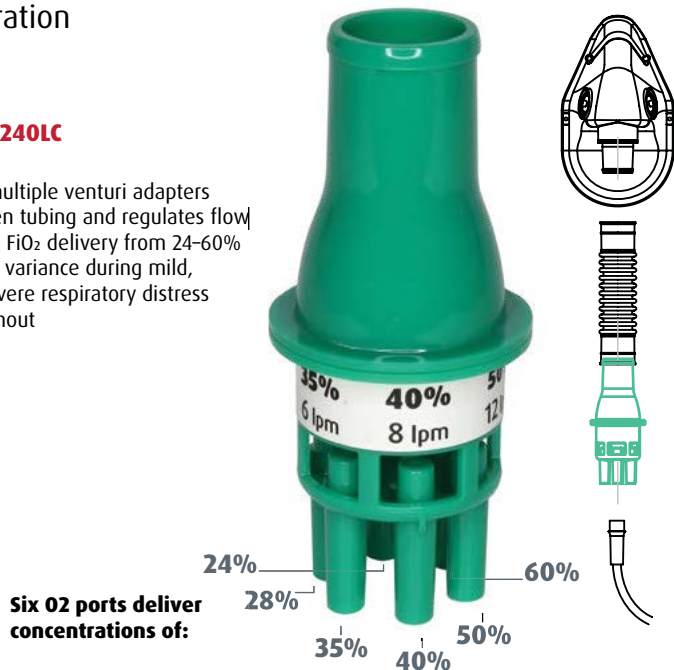

Low Concentration

Item# **RES2400**

Each

Adapter Only **RES240LC**

- Design replaces multiple venturi adapters
- Connects to oxygen tubing and regulates flow
- Provides precision FiO₂ delivery from 24-60% with less than 2% variance during mild, moderate, and severe respiratory distress
- Excellent CO₂ washout

Unprecedented simplicity

No training required. Intuitive design makes it easy for nurses to operate without assistance, freeing up RTs to work where most needed.

Do no harm

Quicker de-escalation of O₂ levels and prevention of excessive CO₂ in the patient.

Reduction in waste

Remains with patient throughout EMS and hospital journey, replacing multiple adapters which may get lost or contaminated during transition.

High Concentration

Item# **RES2401**

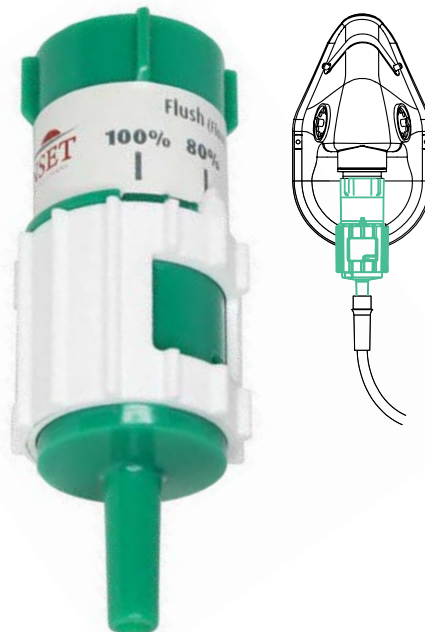

Each

Adapter Only **RES241HC**

- Allows rapid de-escalation of FiO₂ in the EMS ambulance or ED to prevent CO₂ buildup.
- Replaces bulkier high concentration venturis and non-rebreather bag systems
- Accurate assessment of the severity of hypoxemia (PaO₂/FiO₂) allows early intervention and better outcomes
- Excellent CO₂ washout

Single flow (flush) with an adjustable window shutter delivers oxygen concentrations of 65% • 80% • 100%

Capabilities could include replacing non-rebreathers and/or partial rebreather products

Unmatched precision

Provides specific levels of oxygen with less than 2% variance. Comparable products vary by as much as 30%.

Volumetric Incentive Spirometer

12/case

Item#
RES055
2500ml

RES056
5000ml

RES055P
Pediatric

SCAN FOR VIDEO

- Chambers for ball and volumetric
- Tube
- Mouthpiece

The Volumetric Incentive Spirometer helps patients perform and monitor their own post-surgical breathing exercises. The patients are encouraged to breathe in from the device as slowly and as deeply as possible.

- Adjustable target indicator provides a volumetric guideline for adequate lung exercise
- Dual-sided, clear and legible identification of volumes
- Inspiratory indicator encourages patients to maintain an appropriate rate inspiration
- Compact and ergonomic design

Three Ball Spirometer

Item#
RES057-10
10/pack

RES057
12/case

- Improves the patient's lung expansion by training their inhaled lung volume
- Three color coded balls inside the chamber offer incentive for the patient

- Three color-code balls in three chambers
- Chamber to lung capacity: 600cc/sec, 900cc/sec, and 1200cc/sec
- Compact design and break-resistant plastic
- Each set includes incentive spirometer, disposable mouth piece and flexible tube

Drainage Bag with Y-Adapter

Item# **RES071**
750cc
50/case

- Designed to ensure patients receive mist rather than liquid accumulated in the tubing
- Includes hanger and bottom drainage port
- Works with 22mm corrugated aerosol tubing

Drainage Bag with T-Adapter

Item# **RES070**
750cc
50/case

Final Bacteria Filter

Item# **BF516**

machine and tube for
additional protection
against bacteria and
allergens

Filter Specifications

Bacterial Filtration Efficiency: (BFE) 99.99+%

Viral Filtration Efficiency: (VFE) 99.9+%

NaCl Particulate Filtration Efficiency: 96+%

Flow Resistance: Approximately 8.8 mmH₂O at 30 LPM

Internal Volume: 66.3 mL without fittings / 78.3 mL with fittings

Connections:

• Patient End: 22 mm OD / 15 mm ID

• Machine End: 22 mm ID

Bacterial/Viral HME Filter – Adult

Item# **BF104**

Each

- Bacterial efficiency 99.9999%
- Viral efficiency 99.999%
- Humidification efficiency 37.5 mg/l H₂O (500 ml tidal volume)
- Coupled with a hydrophobic bacterial viral filter membrane

Passive Non-Heated Breathing Circuits

For use with Respironics Trilogy
Each

Exhalation Port	Item#	OEM#
Swivel	VC1000	1073228 & 1073236

Humidoflo High Flow Nasal Cannula

- Tube Side Quick Switch connects tube to either side of the patient
- Kink-free prongs and flexible, low-noise tube
- Compatible with any ventilator with a standard 22mm ISO connector, including Respironics V60
- Suitable alternative to Philips AC611
- Can be used with F&P 850 and 950 with HFN001-FPA adapter
- Comparable to F&P OptiFlow cannula (OPT942, OPT944, OPT946)

Universal Connector

FireSafe Nozzle

Item#

RES010FND

10/pack

- A thermal fuse designed to stop the flow of oxygen in the event that the downstream oxygen tubing is ignited
- Helps protect against oxygen tubing fires
- Helps keep patients safe no matter what method of oxygen delivery they use
- Offers a cost-effective solution to lower the risk of serious patient injury in an oxygen fire

**Firesafe™
Nozzle**

Christmas Tree Connector

Item# RES001

Green without Swivel
10/pack

RES001-30
30/pack

Item# RES002

Green with Swivel
10/pack

- Tapered and barbed nut and nipple assembly allows secure tubing connections
- For standard DISS threaded oxygen outlets
- Improved threading is easier to connect to regulators or flow meters

Oxygen Tubing Connector — Non-Swivel

Item# RES012

Fits 3/16in and 1/4in
ID Tubing
10/pack

- Barbed ends ensure secure, leak-free connections

Tubing Reducer Connector

Item# RES011

Fits 3/16in, 1/4in,
5/16in, 3/8in, and 7/16in
ID Tubing
10/pack

- Tapered on both ends to connect multiple sizes of tubing, works with suction, oxygen, and catheter tubing

Humidifier Tubing Adapter

RES019-1 1/pack

Oxygen Tubing Y-Connector

Item# RES017

Fits 3/16in and 1/4in ID Tubing
(All 3 sides are the same)
10/pack

- Connects two oxygen sources for higher flows

Connector with 6mm Oxygen Stem

Item# RES058

22mm with 6mm Stem
10/pack

Finger Pulse Oximeter

Item# **RES5102**
Each

- Oversized 1.3" OLED display face
- Features large numeric font
- Five grades of brightness adjustment
- Displays SpO2, PR and PI parameters and pulse wave graph
- Offers buzzer, demo and visual alarm functions
- Easy to navigate menu sets alarm limits or switches buzzer on/off
- Includes lanyard and manual

Wrenches

Item# **RES031**
With Chain
10/pack
RES031-1 1/pack

Water Traps

Item# **RES037**
Push On End Caps
Each

- Keeps water out of cannula
- Connects between cannula and supply tubing
- Removable end caps allows drainage of accumulated water
- 9cc water capacity in horizontal position

Oxygen Liter Meter

Item# **RES034**
0-10 Liter/Minute
Each

- Oxygen pen
- Works with tanks and concentrators

Nebulizer Compressor

Item#
NEB100

- Disposable Nebulizer Kit with Angled Mouthpiece (RES096)
- Foam Filters (BF018 x5)

NEB100-R

- Disposable Nebulizer Kit with Angled Mouthpiece (RES096)
- Reusable T-Piece Kit (RES093)
- Foam Filters (BF018 x5)

Features

- Rust-resistant
- Quiet (below 60dBA)
- 6ml medication capacity
- Average nebulization rate above 0.2ml/min
- Particle size: respirable fraction 0.5 to 5um 80%
- Compressor pressure range 30-45 PSI
- Operation pressure range 12-14 PSI
- Liter flow range 8-10 LPM

Includes

- Compressor
- Disposable T-Piece Kit
- Foam Filters

PeDIA - Pediatric Device for Induction of Anesthesia

Item#

ANEP021Y

With Mask Adapter Elbow

12/pack

2025 Innovation Celebration Winner

Use with
mask

Or use
without
mask

Turn panic into play

For children, undergoing surgery is already unsettling, and the process of induction is often the most traumatizing part. Often kids will kick and scream, believing they're being trapped by the gas or suffocated by the mask. The experiences create negative emotional scarring that can last weeks, months or even years.

Specially designed for children undergoing surgery, the Pediatric Device for Induction of Anesthesia device, or "PeDIA," for short, includes a colorful whistling balloon, providing kids with something fun to focus on and turning a stressful moment into a lighter one.

Whether they're squeezing the balloon and focusing on its whistle or directly putting themselves to sleep by breathing the gas through balloon delivery, the PeDIA balloon captivates children's attention, allowing their active participation in the induction process.

It's a simple way to add a brighter touch to the medical experience, ease anxiety and bring smiles to patients, parents and staff.

This unique approach—presenting an interactive, familiar toy-like device—not only diverts children's focus from the impending procedure but also significantly reduces the anxiety and resistance commonly associated with mask induction. The aim is to decrease the anxiety felt by over 50% of pediatrics as well as parents and staff.

The PeDIA can be used alone as a mask-free device or, for younger children, with an anesthesia mask.
