Large & XL	CM060-NVKITL

- New non-vented configuration supports use in closed-circuit ventilation systems, including ICU settings
- Designed specifically for pediatric patients, reducing reliance on ill-fitting small adult masks
- Compatible with dual-limb circuits and adaptable to single-limb systems with an exhalation valve
- May support improved therapy delivery through better fit and system flexibility
- SKU reduction by reducing the need for multiple mask types per patient

Available Size Guide

Large and Extra Large sizes help fill a critical pediatric sizing gap, with more potential to avoid intubation.

FinTek allows more adjustability to conform the mask to the face

One-piece molded silicone mask is small, light and comfortable

Headgear with 6-point velcro provides maximum comfort and versatility

Quick release clips

Dual 360 degree swivel elbow

Vesper Nasal Headgear
HG207

Vesper masks introduce a pared back fit, with up-to-date design details like the fabric-wrapped ergonomic stabilizing arms that curve up to the temples for patients who prefer to forego a forehead piece.

Vesper masks provide more visibility, a feeling of openness and a lighter fit. The flexible interface moves with side or stomach sleepers. The open structure eliminates forehead marks. Vesper masks also feature a 360-degree swivel elbow to prevent awkward tube tangles.

Vesper comes in attractive retail packaging

Features

Soft and skin-friendly headgear fabric helps patients comfortably adapt to treatment

Quiet honeycomb vent reduces airflow erosion intensity for peaceful sleep

Easy pop cushions attach or detach from mask in an easy pop; no need to painstakingly align pieces

Quick release connector rapidly and easily separates or connects mask and the tube

Sleepnet's patented AIR°gel® technology provides maximum comfort while minimizing skin irritation and pressure points on the nasal bridge. Unlike many other gel masks, the unique qualities of AIR°gel® allow the mask to seal with minimal tension. By design AIR°gel® is twice as soft as competing gel products.

- Sleepnet has the only mask that you can shape to each individual face. Flex, Fit, Forget!
- Cushions may be removed and replaced without purchasing a new mask.

- The Veraseal® 2 disposable full face mask brings AIR°gel® Technology to the acute care environment for a giant step forward in patient comfort. Three color coded elbow designs make choosing the right mask for CPAP, single, or dual limb circuit NIV systems simple. The Veraseal® 2 fits quickly and easily while enhancing patient comfort. Both vented (with leak ports) and non-vented (without leak ports) versions are available for CPAP, Bilevel, and ventilator therapy.

- The AIR°gel® cushion provides the utmost in gentle cushioning to protect from pressure points and irritation. AIR°gel® promotes advanced skin protection, superior performance, and unbeatable comfort, all in a lightweight mask.

- The active headgear connector moves as the patient moves for a reliable seal.

- Breathable headgear lets patients enjoy soft, lightweight stability they can count on for a comfortable fit.

Assured, repeatable accuracy to enable safe, effective weaning.

What is Microflow used for?

Microflow is primarily used to supply supplementary oxygen to infants with bronchopulmonary dysplasia (BPD).

BPD is common in very low birth weight and pre-term infants that have needed mechanical ventilation or have been treated with high oxygen concentrations due to respiratory distress syndrome (RDS)/chronic lung disease (CLD).

The risk of RDS/CLD is inversely related to birth weight and gestational age.

Infants may need very low supplementary oxygen for many months to compensate for underdeveloped lungs.

Microflow benefits

- Enables baby to receive oxygen therapy at home, putting families together sooner and increasing parent satisfaction
- Less time in hospital, lower cost of care
- Accurate, repeatable steps
- Micro step changes in flow
- Enables low flow rates to achieve target saturation
- Enables oxygen flow to be weaned

Non-Heated Breathing Circuits

Lynx Venturi Oxygen Delivery

Low Concentration

Item# **RES2400**

Each

Adapter Only **RES240LC**

- Design replaces multiple venturi adapters
- Connects to oxygen tubing and regulates flow
- Provides precision FiO₂ delivery from 24-60% with less than 2% variance during mild, moderate, and severe respiratory distress
- Excellent CO₂ washout

Six O₂ ports deliver concentrations of:

24% 28% 35% 40% 50% 60%

Unprecedented simplicity

No training required. Intuitive design makes it easy for nurses to operate without assistance, freeing up RTs to work where most needed.

Do no harm

Quicker de-escalation of O₂ levels and prevention of excessive CO₂ in the patient.

High Concentration

Item# **RES2401**

Each

Adapter Only **RES241HC**

- Allows rapid de-escalation of FiO₂ in the EMS ambulance or ED to prevent CO₂ buildup.
- Replaces bulkier high concentration venturis and non-rebreather bag systems
- Accurate assessment of the severity of hypoxemia (PaO₂/FiO₂) allows early intervention and better outcomes
- Excellent CO₂ washout

Single flow (flush) with an adjustable window shutter delivers oxygen concentrations of 65% • 80% • 100%

Capabilities could include replacing non-rebreathers and/or partial rebreather products

Reduction in waste

Remains with patient throughout EMS and hospital journey, replacing multiple adapters which may get lost or contaminated during transition.

Unmatched precision

Provides specific levels of oxygen with less than 2% variance. Comparable products vary by as much as 30%.

CPAP Tubing V

Item#

TUB008 8ft

TUB010 10ft

19mm with 22mm cuffs

HCPCS# A7037

- Compatible with nearly all CPAP, BiPAP and BiLevel systems for every manufacturer on the market
- Smooth interior and a corrugated exterior for excellent flexibility and unrestricted interior flow characteristics
- Injection molded cuffs to reduce tearing
- Low memory to avoid kinks
- BPA-free and latex-free

Firesafe Thermal Shut-Off Valve V

Item#

RES010-10
10/case

RES010VAKIT

Kit with 2 Firesafes,
Cannula, 7ft Tubing,
and Connector

Each

- A thermal fuse designed to stop the flow of gas in the event that the downstream oxygen tubing is ignited
- Helps protect against oxygen tubing fires
- Helps keep patients safe no matter what method of oxygen delivery they use
- Offers a cost-effective solution to lower the risk of serious patient injury in an oxygen fire
- Smaller
- Laser etched
- Expiration date
- Human readable UDI
- Designed to last 5 years

Home oxygen fires represent a much higher risk in the United States than the United Kingdom, where the fitting of thermal fuses for oxygen is mandatory.

Fatalities per 100,000 patients

* 1 death was reported among 73% of the patient population (2013-17)

Inline Bacterial Viral Filter for CPAP/BIPAP/Vent Units V

Item# **BF2200**
22mm Bacteria
Disk Filter
5/pack

Attach between the machine and tube for additional protection against bacteria and allergens

Filter Specifications

Bacterial Filtration Efficiency: (BFE) 99.99+%
Viral Filtration Efficiency: (VFE) 99.9+%
NaCl Particulate Filtration Efficiency: 96+%
Flow Resistance: Approximately 8.8 mmH2O at 30 LPM
Internal Volume: 66.3 mL without fittings / 78.3 mL with fittings

Connections:

- Patient End: 22 mm OD / 15 mm ID
- Machine End: 22 mm ID

Bacterial/Viral HME Filter – Adult V

Item# **BF104**
Each

- Bacterial efficiency 99.9999%
- Viral efficiency 99.999%
- Humidification efficiency 37.5 mg/l H2O (500 ml tidal volume)
- Coupled with a hydrophobic bacterial viral filter membrane

Pediatric

SCAN FOR VIDEO

- Chambers for ball and volumetric
- Tube
- Mouthpiece

The Volumetric Incentive Spirometer helps patients perform and monitor their own post-surgical breathing exercises. The patients are encouraged to breathe in from the device as slowly and as deeply as possible.

- Adjustable target indicator provides a volumetric guideline for adequate lung exercise
- Dual-sided, clear and legible identification of volumes
- Inspiratory indicator encourages patients to maintain an appropriate rate inspiration
- Compact and ergonomic design

Drainage Bag with Y-Adapter V

Item# **RES071**
750cc
50/case

- Designed to ensure patients receive mist rather than liquid accumulated in the tubing
- Includes hanger and bottom drainage port
- Works with 22mm corrugated aerosol tubing

Three Ball Spirometer

Item#
RES057-10
10/pack

RES057 V
12/case

- Improves the patient's lung expansion by training their inhaled lung volume
- Three color coded balls inside the chamber offer incentive for the patient

- Three color-code balls in three chambers
- Chamber to lung capacity: 600cc/sec, 900cc/sec, and 1200cc/sec
- Compact design and break-resistant plastic
- Each set includes incentive spirometer, disposable mouth piece and flexible tube

Drainage Bag with T-Adapter V

Item# **RES070**
750cc
50/case

Finger Pulse Oximeter

Item# **RES5102**
Each

- Oversized 1.3" OLED display face
- Features large numeric font
- Five grades of brightness adjustment
- Displays SpO2, PR and PI parameters and pulse wave graph
- Offers buzzer, demo and visual alarm functions
- Easy to navigate menu sets alarm limits or switches buzzer on/off
- Includes lanyard and manual

90-Degree CPAP Tubing Elbow V P

Item# **CAP1027**

Each

The Sunset 90-Degree CPAP Tubing Elbow Adapter connects standard 22mm or slim 15mm CPAP tubes to most CPAP machines at a 90-degree angle, relieving stress on the tubing connection and creating a more convenient pathway to the bed.

Comparable to OEM# 37394

- Clear bulk tubing in rolls that can be cut into the exact length needed.
- Cut-to-size female connectors are located at 6ft intervals.
- Disposable accessories make it easy to add auxiliary items to your system.
- Flex Advantage liners, Guardian systems, Medi-Vac accessories are interchangeable to help you select the most effective setup for your needs.
- Allows you to adapt your system for various setups.
- Used to connect vacuum source to canisters and manifolds.

Solidifier — Dissolvable Sachet

100/case

Item#	Size
RES8001	150cc
RES8004	450cc
RES8015	1500cc

Economical

Pre-measured rupturing pouches eliminate the tearing and spillage associated with conventional solidifiers for medical waste.

Particulate-Free

Self-activating technology reduces particulates and bacterial exposure, and eliminates harmful dust.

Reduce Exposure

Helps to minimize the risk of cross contamination of infectious waste to medical staff.

Solidifier with Treatment — Dissolvable Sachet

100/case

Item#	Size
RES8002T	250cc
RES8005T	500cc
RES8007T	750cc
RES8015T	1500cc

Contain spills quickly with this astonishingly absorbent liquid solidifier packet

Super absorbent packets quickly absorb up to 400 times their own weight in aqueous solutions. These drop-in liquid absorbers offer the ideal solution for shipping, storing, and handling of aqueous solutions that must be contained quickly and effectively in the event of a leak.

Smart Design

Specially formulated pouch bursts open in the presence of a wide range of fluids to quickly immobilize them. Solidified material is easily contained by an outer vessel, shipping container, or other such device, resulting in safer handling.

Ideal for Medical Use

The most common applications for the use include medical shipping containers and bio-specimen transportation bags used for vials, test kits, and lab trays.

NEB100-BAG V
Carry Bag

- Rust-resistant
- Quiet (below 60dBA)
- 6ml medication capacity
- Average nebulization rate above 0.2ml/min
- Particle size: respirable fraction 0.5 to 5um 0.5um 80%
- Compressor pressure range 30-45 PSI
- Operation pressure range 12-14 PSI
- Liter flow range 8-10 LPM

Handheld Compressor Nebulizer V

Item# NEB200

Included:

- Compressor
- Medication cup
- AC power adapter
- Air hose
- Elbow
- Mouthpiece
- Mask
- 4 AA batteries

- Runs on 4 AA batteries or AC power adapter
- Portable (small and weighs only 1/2 pound)
- Quiet (60dBA)
- Fine particle size (Approximately 3 microns)
- No replacement filter required

Mini Mesh Nebulizer with Rechargeable Battery V

Item# NEB401

Included:

- Main unit
- Medicine cup
- Disposable mouthpiece
- Disposable adult mask
- Disposable pediatric mask
- USB cord
- Carrying bag
- Instruction manual

Closed Ventilation Suction System V

Standard Switch

Sterile and latex-free

With the unique isolation valve, 72hr closed suction system features safe and simple access for mechanical ventilated patients for 72 hours of continuous use.

Once the airway is clear, withdraw the catheter completely into the plastic sheath. A black mark on the catheter indicates full withdrawal.

ISO color coded for instant recognition of catheter sizes.

Smooth tubing surface and atraumatic rounded catheter tip for minimal tracheal wall injury.

Closed Ventilation Suction System

Deluxe Switch (one-handed operation)

Sterile and latex-free

Suction Control Switch

Ergonomic suction control switch with a built-in security lock to visually determine if the device is in the OFF/ON position. Offers a quick and easy, single-handed operation design, which allows you to keep your eye on the patient and do no harm. One-handed operation allows the free hand to support the ET or Trach device to ensure less trauma to the site.

Irrigation Port

Offers a one-way valve to prevent backflow leakage and easy access for cleaning the closed suction system.

MDI Port

Provides access for drug delivery as needed. Large and easy to grip port allows for rapid medication introduction.

Catheter Tip

Atraumatic rounded catheter tip for minimal tracheal wall injury.

Isolation Valve*

Seals the irrigation chamber to provide a better cleaning of the catheter. Allows for continuous ventilation and prevents backflow of saline during cleaning to ensure patient comfort and safety.

*Only available with 72 Hour catheter

Black Ring Indicator

Ensures that the catheter is properly withdrawn from the ET or Trach device. Black ring must be visible in the plastic sheath after suctioning the patient.

PeDIA - Pediatric Device for Induction of Anesthesia V P

Item#

ANEP021Y

With Mask Adapter Elbow

12/pack

2025 Innovation Celebration Winner

Use with
mask

Or use
without
mask

Turn panic into play

For children, undergoing surgery is already unsettling, and the process of induction is often the most traumatizing part. Often kids will kick and scream, believing they're being trapped by the gas or suffocated by the mask. The experiences create negative emotional scarring that can last weeks, months or even years.

Specially designed for children undergoing surgery, the Pediatric Device for Induction of Anesthesia device, or "PeDIA," for short, includes a colorful whistling balloon, providing kids with something fun to focus on and turning a stressful moment into a lighter one.

Whether they're squeezing the balloon and focusing on its whistle or directly putting themselves to sleep by breathing the gas through balloon delivery, the PeDIA balloon captivates children's attention, allowing their active participation in the induction process.

It's a simple way to add a brighter touch to the medical experience, ease anxiety and bring smiles to patients, parents and staff.

This unique approach—presenting an interactive, familiar toy-like device—not only diverts children's focus from the impending procedure but also significantly reduces the anxiety and resistance commonly associated with mask induction. The aim is to decrease the anxiety felt by over 50% of pediatrics as well as parents and staff.

The PeDIA can be used alone as a mask-free device or, for younger children, with an anesthesia mask.
